Westminster Briefing

Westminster Briefing is part of Dods Parliamentary Communications, Europe's leading political information, public affairs and policy communication specialist. Established in 2003, Westminster Briefing runs half-day and full-day events covering all areas of public policy, from education to health and criminal justice. Our briefings are aimed at providing delegates with an understanding of the practical implications of legislative changes and policy interventions. We attract leading figures from the Government, the wider public sector and industry to speak at our events, which are attended by a mix of policy.
